S.LOGS11, Proof nFDC, we note very minor contact marks on the Boxing, Sailing, Canoeing and Taekwondo coins, all in the original Royal Mint packaging, so this as released from the Mint. Set with certificate number 13 (NO. 13 embossed in gold on the wooden lid) housed in a quality cabinet style wooden presentation box with a separate drawer for the certificate and CD (unopened), and a CHIEF ENGRAVER MASTER PROOFS presentation card which shows the engraver's master proofs embossed in gold, the whole with outer card box. This is a rare set and must be The Holy Grail certainly of 50p sets and perhaps of the entire Royal Mint modern series since 1979. Some ambiguity has surrounded the mintages of these coins as the first time they appeared in The Coins of England reference book by Spink it was stated that just two of each coin had been struck one for the designer the other for the gold medallist. The certificate on this set states $13 / 29$, however the vendor has provided us with actual sales figures (rather than mintage limits) that he has obtained from The Royal Mint which indicate that just 15 of these 11 coin sets exist and states the additional coins issued separately so giving the following total mintages for each sport
as Athletics 26, Boxing 18, Rowing 26, Cycling 26, Equestrian 22, Sailing 17, Shooting 17, Tennis 25, Taekwondo 15, Triathlon 22, Canoeing 17 (therefore no Taekwondo coins exist other than in these 15 sets). These are excessively low figures and anyone with an eye to wealth creation should reflect on the current values of Royal Mint proof sets that include gold from yesteryear, sets with mintages of 150 (10 times more than these 50 p sets) can realise six figure sums. We have only offered one previous set, this back in June 2019, we note a tennis coin being recently advertised online for over $£ 7500$. ( $£ 35,000-£ 40,000$ )

The Davies 1672N Halfcrown listed here may also be a R.M. trial, when a complete elimination of silver seemed feasible. There appears to be an interesting 'privy' mark, introduced by a thicker downstroke to the ' $D$ ' of 'Dei' with the top and bottom serifs of this ' $D$ ' being double struck. The border bead above compensates for this downstroke by being oversized.
